I am a 29 years old Ecuadorian, Tech Entrepreneur, Solutions Architect, and Frontend Developer. My personal purpose is to build solutions that help others to decrease uncertainties. Technology has been one of my passions since I was a child because I believe that technology is a tool with the power to improve most of the problems of our society. The activities in my charge I carry out with a lot of energy and enthusiasm, always seeking to obtain the best result. In my free time, I like trekking and watching soccer matches, especially the goals of teams I like on youtube
